

ProTeam Brominating Tablets

Slow Dissolving Brominating Tablets For Pool & Spa.

Refreshingly Simple Pool Care

FEATURES

All Bromine tablets are not alike. Some have more chlorine activator than bromine and lack the soft gentle feel of a bromine pool. *ProTeam Brominating Tablets* use just enough activator and become 100% bromine as it enters the pool

Bromine is superior viricide and bactericide compared to chlorine

As bromine is used, it forms a bromine bank that is re-activated every time the pool is shocked

Bromine is easy to use by simply adding tablets to the brominating feeder

BENEFITS

Bromine is not as pH sensitive as chlorine. At a higher pH it is twice as active as chlorine

Bromine has less offensive odor than chlorine

When bromine is combined with organic matter, it is still an effective germ fighter

Bromine does not deteriorate in storage

APPLICATION

Initial bromine level should range between 1-3 ppm

Maintain correct bromine level with regular water testing and adjustment using a reliable test kit

Add bromine tablets when feeder is half full. Frequency will be determined by bather usage and weather

AVAILABLE SIZES

4 lb. pail, 25 lb. pail, 50 lb. pail
