

## ProTeam Metal Magic

Effectively removes metals from pool water and metal stains and scale from surfaces. Non-foaming and pH neutral.

Refreshingly Simple Pool Care

### FEATURES

- Crystallizes and removes metals from pool water through the filter
- Removes unsightly stains from pool surfaces and equipment of the pool
- Helps to lower calcium hardness
- Removes Iron, Copper, Silver and Manganese metals

### BENEFITS

- Compatible with all types of filtration
- Removes metallic stains
- Removes scale
- Prevents staining and protects plumbing and equipment

### APPLICATION

- Adjust pH to 7.5 – 7.8
- Apply over entire pool surface
- Keep filter running continuously for 48 hours
- For best results water temperature should be above 60 degrees
- Initial treatment use 1 quart per 10,000 gallons of pool water if metals are present
- Maintenance treatment use 3 ounces per 10,000 gallons of pool water weekly
- Swimmers should wait 8 hours before entering pool once treatment is executed
- For severe conditions, refer to the *ProTeam Metal Magic Sponge Test* and treatment guidelines

### AVAILABLE SIZE

1 qt. bottle (12 per case)
