

ProTeam Superfloc Clarifier

For sparkling clear water. Highly concentrated clarifier collects cloud causing particles that have formed in swimming pool water and are too small to be trapped in the filter.

Refreshingly Simple Pool Care

FEATURES

Drops both live and dead organic particles suspended in pool water to the bottom

Only clarifier that will lower Total Dissolved Solids (TDS)

Compatible with chlorine and bromine treated pools

Will not affect pool chemistry

BENEFITS

Promotes sparkling clear pool water

Lowers maintenance costs

Allows particles to be vacuumed to waste

APPLICATION

With filter running use 8 ounces per 10,000 gallons of pool water over the entire pool surface

Shut pump and filter off after 1 hour

Do not swim or allow pump to start (water must remain still)

The suspended particles will fall to the bottom of pool and water will clear

Vacuum pool to waste if possible

A second vacuuming may be necessary if particles are forced into temporary suspension

AVAILABLE SIZE

1 qt. bottle (12 per case)
